A Letter to our Customers about California's Proposition 65

Instrumentation Industries, Inc. manufactures and distributes respiratory and anesthesia devices for the medical community, providing practical, affordable solutions that complement respiratory and anesthesia applications.

California Regulation Proposition 65 (officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986) requires businesses to provide warnings to Californians about exposures to substances that can cause cancer, birth defects or other reproductive harm.

Our medical devices are manufactured with quality materials and we believe that our products are safe for all of our customers.

As our products are widely distributed throughout the United States, III now applies a disclosure label to all products that might contain any of these substances, no matter how small the amount. This is being done to maintain our desire for complete transparency with our products and customers while analytical testing is completed.

We hope that you continue to trust Instrumentation Industries Inc. for your respiratory and anesthesia needs.
